

materials:

- Deep yellow mustard felt
- 7 wooden beads
- Scissors
- Sewing cotton and needle

Here is an example where we used buttons and running stitches to embellish the flower.

Felt poppy

instructions:

1 Take the felt and cut 4 rectangles from it, each a little smaller than the previous one. Stack them on top of each other to make sure that they are properly graduated.

2 Take the pair of scissors and round each corner of each rectangle. Stack them

on top of each other and rotate them a bit so that they overlap in an attractive way.

3 Thread the needle with the sewing cotton. Pick up all four pieces of felt and push the needle from the centre and right through all four layers of felt to the top. Sew down the centre bead. Sew down the rest of the beads around the centre

bead. Make a few half hitch knots and trim the thread.

You can use the flower on anything: hair slides, hair bands, clothes, on a brooch pin or as a décor item like a serviette embellishment or ring. **CH**
